Florida Area Marketing Representative

Are you a **sales and marketing professional** looking for a new challenge that is different and exciting? Are you good at promotion, overcoming roadblocks, working with diverse teams, juggling multiple tasks, and managing numerous high-level relationships? Are you ready to take the lead in growing the Florida construction market for structural steel?

The **American Institute of Steel Construction**, founded in 1921 as the trade association for the structural steel industry, is looking for the right person as a Florida Area Marketing Representative. Your success will depend on your ability in developing and maintaining relationships with key influencers, pursuing projects, working with local media, and coordinating local promotional opportunities. The ideal candidate will be a seasoned sales and marketing professional possessing a bachelor's degree with at least eight years of experience marketing solutions to building owners, developers, architects, general contractors, and structural engineers. Strong communication and computer skills are a must.

To submit your resume for consideration and request a full description of this Florida-based position, please contact John Cross, Vice President, AISC Marketing LLC at cross@aisc.org. EOE

Regional Engineer

You will be responsible for directing and growing the market for structural steel in the Upper Midwest Region (Indiana, Ohio, Michigan, West Virginia, Kentucky). Success will be measured in how effective you are at implementing a regional technical marketing plan to be developed with assistance from the Vice President of Marketing. Position allows for a great diversity of activities in taking charge of your region: providing general technical assistance, working with owners and architects, making presentations, conducting seminars, assisting structural steel fabricators with promotional and business development programs and serving on key industry committees. Success relies on your engineering prowess, interpersonal and presentation skills and ability to develop strong consultative relationships. Ideally you will already be in a position where you have many contacts outside of a traditional engineering office. Sales aptitude is a must. If you have actual business development and or marketing experience it is a plus.

Position requires civil or structural engineer with minimum five years experience in building design and construction and or fabrication.

Position located in within the assigned region.

AISC provides training and competitive salary with excellent health and retirement benefits.

To submit your resume for consideration, contact John Cross, Vice President, AISC Marketing LLC at cross@aisc.org. EOE
